

# Alphabet Matching Tin Games

## Items used to make this Project:

- CD-3457 Alphabet: Kid-Drawn (Traditional Manuscript) Bulletin Board Set header
- Self-adhesive magnetic tape or sheets
- Clear contact paper
- Metal tin

**Directions:** Take the header card from the bulletin board set and cut out each set, separating the letter from the picture. Attach the pictures around the outside of the tin using clear contact paper. Place the letters on the magnetic strips, cut them out, and place them on the inside of the tin. The students can now match each letter to the picture of the thing that starts with that letter.
