

My Book of Shapes

Items used to make this Project:

- CD-110044 Shapes Mini Bulletin Board Set
- Construction paper
- Glue
- 1" loose leaf book rings

Directions: To make the cover page, cut the shapes from the header card of the bulletin board set. Glue the shapes from the header card to the cover page along with the words "My Book of Shapes." On the front of the first page, place the solid color rectangle piece and the name card. The riddle, "Rectangle, Rectangle, what can you be? Turn the page and you will see," also goes on the front of the page. On the back of the page, glue the other rectangle object pieces along with the question "What else can be a rectangle?" Repeat the riddle for each shape. Encourage students to identify the shapes in the room around them.
